The Rebuke of Intolerance. The sentiment of the people of the Union, as provision of the Constitution which gives to every man perfect freedom of conscience and peech. There is in every State, save one, a monstration of the feeling of devotion to the sacred rig'it of free speech. Intolerance-bigoty-proscription-all those base and contemptible characteristics of the Know Nothing party have been signally rebuked. The people have risen in their might, and proven that they not only a lowed, but cherished the great and ina-

henable right of free speech. In this Union the free utterance of every man's centiments cannot be muzzled. They are proven to be equal to any emergency, and migh.y in all cases. Whatev r spirit animates the people-whatever may be their religion-whatever are their personal passions, the result shows this one and glorious fact, that la oring for the perpetuity of the Union there yet exists a great and

It is evident that in this section of our continent there pervades but one great and overwhelming centiment-that is, for the Union, and against religious and political proscription. The | boldly to violate the laws. vote of the people is no mere demonstrative of their love for the Confederacy than it is for their hatred of the great cardinal features of Know-Nothingism-intolera ce and bigotry. We see that a wise and judicious people contemn and despise and repudiate any interference with the rights of citizenship and the tolerance of religious sentiment. The puritanism of 1630 cannot be re-established. The proscriptiveness of Virwhich the Declaration of Independence secured the process of the proscriptiveness of Virwhich the Declaration of Independence secured the process of th rights of citizenship and the tolerance of religbe re-established. The proscriptiveness of Virginia in 1776 cannot be re-established. That to us cannot be taken away We are free to vote and worship as we choose. There they labored with unholy zeal for disunion, and came too near accomplishing that damnable game.

But upon a review of the field we find that we have nothing of regret. We find that the love s sec ional and proscriptive. In every section that grand and almost consuming idea of love for the Union and the Constitution, is devotion to the great principle of free apeach and actiontreedom to write and speak, and above all else to

That is one of the gnarantees, not only of our creat federal compact, but the spirit was implantd into us in the first years of our combined government. The Puritans of Massachusetts the flourishing colony of Rhode Island emerged from the wilderness, clad in the panoply of truth, and bold in its utterance of the entire and unquestionable right of free speech and free worship. Just prior and first after the Revolution there was a series of persecutions in Virginia. for the sake of religion. But the great idea of the Constitution soon counterbalanced that. Mcn knew they were right. Tyranny was deposed, and perfect religious freedom was established in Virginia, years after the glorious principles of the Declaration had been enunciated and con-

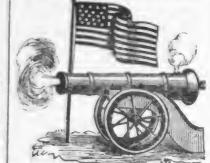

ers among us so much of the bold and uncom peomising spirit ot our fathers. This free and broad and happy land was intended as an asylum for all from every foreign conn'ry, who might choose to seek it. We are determined, as the some of those sires, to give to all freedom of apeech, and action, and suffrage, restrained of religious sentiment. These we have gained by the recent election The glorious voice of the people from all fections is for perfect equality in religion and ancestral origin. So must it ever be. Election Outrages. Many Know Nothing Judges of Election u-nal, and in direct violation of all law, refused o receive the votes of foreigners who had not een living in the State one years fter being natualised. Judge Pirt'e and Hon, G A. Caldwell, epresenting the two political parties in this city prepared a written opinion the day before the ction, to the effect that a foreigner could vote the very day he was naturalised, and that opinion otes in accordance with it. We presume there ot coincide in opinion with Judge Pirtle and Mr. Caldwell, and yet we see Know Nothing Judges, obeying the mandates of an unscrupulons newspaper editor, who has not hesitated to sacrifice his own friends in order to inspire them with confidence, and violating the law, and outraging citizens who have equal rights with

A correspondent at Danville informs us that many of the naturalised voters there were excluded, and a friend at Warsaw, Gallatin county,

There is no telling to what ex'ent this thing as been carried throughout the State, and how many votes have been lost to the Democratic party by it. The outraged persons have it in their power, however, to obtain recourse, and we hope to hear that they will, in every instance, promptly prosecute those judges who forbid them the privilege of exercising the dearest rights of freemen. Let them be compelled to pay the severest penalty the law allows, and they will be careful hereafter not to permit their partisan feelings to carry them so :ar as thus openly and

THE WEATHER .- Last evening we had a regplar melancholy November rain, or rather driz zle. The decay of the year is now fully installed, and we are in the mide: of that drear season which is characterized by crisp and sparkling rosts-the flying and rustling of crimson leaves, he mournful sighing of the wind, and the heavy mists lingering on the bosoms of rivers and lakes ing pages of the yearly sermon of nature, on death and decay, will soon be unfolded. Already the flowers on the hill sides and in the meadows have faded—the gorgeous hues of summer have passed away -the merry warblers have forsaken their forest homes-the blighting sear air is on the leaves -the nipping frost is in the air, and in the heavens, over the woods fielde and lawns, are exh bited signs of the expiring year.

The K. N.'s hereabouts, we must say it ! their sredit, nave behaved very handsomely in regard to their bets. They have already very generally given up their bets on Kentneky. DEATH OF Da. Jos. HOLT .- We learn from a gentleman, who came through Paris, that this roughout the State obeyed the order of the prominent Bourbon died at the residence of his son, near Paris, on Srturday morning last. More than half a century ago he was one of the most prominent Damocra ic politicians of the State, and repeatedly represented the counties of Bourben and Harr son in the State Le islature, and was at one time a prominent candidate for Congress. He was in the Legislature during the relief and anti-relief times - was a warm friend was accepted by the judges here, who received of Col. Sharp, who was assassinated by Beauchamp, and the physici in who was called in at is not an intelligent lawyer in the State who does his death. For some years he was not in office, but bravely stood up as the head of the Demoeratic party in Bourbon against overwhelming odds. He was the father of Col. Thomas H. Holt, of San Francisco, California, who has spent the summer in Kentucky, canvassing for Buchanan and Breckinridge. Col. Holi is a talented lawye, and a fit representative to transmit he Democratic name of his father.

A few years ago Dr. Holt wishing to visit his son and son-in-law in San Francisco, was appointed U. S. mail agent for one trip between New York and San Francisco. Dr. Holt was a "Prentice's law was enfrorced by our worthy udges, requiring foreigners to have resided in the state one year after having taken the final oath to entitle them to vote." gentleman of great talents and brilliant converto learn that his beloved old party was successfu in the Presidential election, and that the grand rom of his o'd friend John Breckinridge, raised the second office in the gift of the American eople, and the Union he loved so dearly perpetnated. Particularly gratifying must it have been o him to learn that Kentucky had returned to the faith of his youthful days. Dr. Holt was about 70 years of age. He leaves a most interesting family of children.

A BANK AT COLMERS CLOSED .- We learn from the Columbus (Georgia) papers that the Manufacturers & Mechanic's Bank, of that city, was closed, causing considerable excitement. Some persons parted with its notes at 25 cents in the dollar, but the papers think this an unnecessary sacrifice. The President, Dr. Taylor, who is represented to be a man of undoubted itegrity, sttempted to commit suicide, on the West Point train, a few days since, in a state of perti linsanity growing out of his difficulties and those of his bank. All Hail, Old Kentucky!

The returns come in gloriously from this old State. In some twenty-old counties the majority for Morehead in 1835 has heen overcome, and in the seventy-old counties to hear from we confidently calculate upon gains which will swell the Dumocratic majority in the whole State to seven or eight thousand. Some of the shrewdest calculators will not be content with less than ten thousand. Linn Boyd's District is good for at least five thousand majority. Kantucky has redeemed herself—wiped from her escutcheon the stains left by the terrible excesses and sauguinary outrages of 1855, and shown herself true to the Union and to nationalism. The narrow minded, higoted and violent faction—it can no longer he called a party—which lnaugurated its reign hyscenes of violence and bloodshed unparalleled in our history, and which has been sustained by appeals to the ignorance, the passions and the religious prejudices of the people, has received in this, its favorite arena, a blow from which it will uever recover. Kentucky stands where she did in 1798—among the foreness of the States which could not he allured, by specious accelulation and

this, its lavorite arens, a blow from which it will uever recover. Kentucky stands where she did in 1798—among the foremost of the States which could not be allured, by specious sophistries and gross delusious, from the faith of Jefferson and Washington.

All bonor to the gallant Democrats for the stardy and firm devotion which they have preserved for years in the State against such powerfulinfinences, in the maintenance of their party organization. With such leaders and champions as Boyd, Breckinridge, Powell, Stevenson, Clark, Wickliffe, Stanton, Magoffin, Harris, and a host of others, backed by the sblest, most energetic and unfluching press in the Union, our party knew no such words as fail, surrender or compromise; but ever presented a bold and fearless front to the enemy in whatever form or guise he appeared. All bonor, too, to the gallant and patriotic Old-Line Whigs, the special friends and supporters of the illustrious trihane and patriotic succor to the Democrary in the great hattle of the Union and for the rights of conscience and religious freedom. Tuey, too, contributed in a Clay, worthy scion of his patriotic father; in a Preston, a Stevenson, a liawes, a Weller, a Hodge—some of the most efficient colaborers and allies in the great battle, in which they ever compelled to face a storm of calumny, vitoueration and insult the great battle, in which they were compelled to face a storm of calumny, vitaperation and insult, the more venomons as it came from their old po-

All honor to the intelligence, manhood and pa-triotism of the people of this gallant first child of the Union—sons of those fathers who, in the dark struggles of the war of 1812 and of the early setstruggles of the war of 1812 and of the early settlement of the West, so generously abandoned their homes, to march to the relief of their neighbors—those 1 eighbors, so many of whose sons are now the nugrateful recreants who have proposed to oppress them, as citizens of a weaker section of the Union, and exclude them from the Government, which was established by the wisdom and eemented by the blood of their fathers.

To Kentucky must be assigned the brightest chaplet, which has been won by the several States that have entered the list in this contest, for patriotic honor and renown. The post of honor is hers, hers by her splendid triumph; hers by the nohle qualities, the hrilliant talents and only heroism of him who, in the second dignity of the Republic, will so faithfully embody and represent those traits which, in the history of our country, have ever been

Napoleon's Fear of Assassination. Paris, Tuesday, Oct. 7, 1856. The Consptracles agains the Emperar.
For once it is evi ent that the Emperor does not rel casy about the attitule of the poorer classes at Paris. He has never before exhibited this feeling as palpably as now. The precautions which he takes for the protection of his person are remarkable, so untoriously defant of danger is he; and this proves that there must he a cause of sufficient gravity to render such precautions necessary. We knew that, already stated, a large number of arrests have been made within three weeks, of period. ons said to be dangerous to the security of his route it would be made. though the evening was mill and pleasant, he rode in a close earriage drove at a furious rate, and was aurrounded closely by a double escort of Guides, each carrying a loaded and eocked pistol in his hand. It is not unusual to see the Emperor go to the opera with Guides thus equipped preceding the cortege; but it is unusual to see them surround the carriage in the manner mentioned. On this occasion no one knew that the Emperor was going to the opera, for the hills did not contain the habitual "par odre," nor was the fact mentioned in the journals. At the Railroad station, when the Emperor ar-

He wishes to raise, and will, perhaps, soon issue his decree to that effect, the number of the Imperial Guardfrom twenty thousand, its present number, to a hundred and fifty thousand men; and of this body of soldiery he proposes to form the permanent garrison of Paris. Mr. Courier: Is this political fever leginning to shate? The names of Buchanan, Fillmore and Fremont are the only sounds and ble, and all he women that ever professed any claims to womanbood might drop all their handstreheirs, freeze all their little moses off a mile from the fir, and finally on off in arop all their handstreners, heers all their little some of a mile from the fir, and finally go off in hysterics at the hrutality of mankind, and the politicians would only show them out of the way, edge their chairs closer together, and settle over again what they have settled five hundred times before in five hundred conferences just as absorbing. I were that can be settled for the conference of the settled five hundred times before in that as soon as this political epidemic subsides a little, we womenkind become so absorbed in some new kind of sewing that we cannot converse on any other so as to entirily siehon mankind from the conversation. But goodness gracions? They would say something about it good, bad or indufferent, particularly the two latter, if they had never heard of the subject before is their lives. What's the use of putting on your best hib and tucker now a-days? SATURDAY, - - - NOVEMBER 15 The Triumph in Kentuck). Our State having gone in the recent coute

for the Democratic nominees appears to excit the wonder of presses of both parties in the North and East. The promises of the Frankfort Clique and the Louisville Snb-Committee were of such a bold and uncompromising char acter; they telegraphed the certainty of Fill more's success so far and wide, and the Know Nothings were so characteristically intoleran and proud, that it was generally supposed that Kentucky was certain for the proscriptive ticket The result, so widely variant, astonishes all parties. We have given in our decided and unmistakeable adhesion to the party of the Union and the nation, as lead by Buchanan and Breck inridge. We have shown that we could neither telerate on the one hand indirect attacks upor the Union, nor the proscription of any of ou fellow-citizens for birth right and religious belief In doing this, Kentucky is but true to herselftrue to her ancient renown-true always to the glory and grandeur and perpetuity of the nation

Mr. Clay, too, deeply imbned our people with the all controlling and necessary idea of the Union of the States to allow any of us to forget or neglect it. Our first settlers, driven hy religious persecution from Virginia, fixed in the minds of their children an ineffaceable and unalterable hatred to any proscription for the sake of religious belief. Our most numcrons chrismination vet retains that sentiment as its proud and leading characteristic. It is the heritage from their fathers who suffered in their native State, fine and imprisonment; who were panished thence to a wilderness, and who choosing then to be free, were so ever afterwards, as ast their children be through all time to come

The Baltimore Riots. We publish this morning a succinct, yet ful account, of the terrible riots in the city of Baltimore. They exceed, if possible, the enormitie enacted in this city in August, 1855. We see that the Know Nothings took possession of all the polls-that, fully armed and prepared, they committed all manner of atrocities, and sustained the character which has so long marked them. At Baltimore, as here in 1855, their stupendous victory was marked by the traces of bloodshed, of outrage, and violence. They ran rampant and triumphant over every ward in the Monumental City. Their bullies were victorious everywhere. In all places they displayed their miserable and bullying prewess. Read the accounts, and it will be seen that wherever and whenever, through the force of enperior bullyism, they could prove victorious, they used their nefarious schemes of

Detached from the immediate criminality o the Know Nothing organization, under the patronage of which these scenes of violence and loodshed were committed, there was another and higher responsibility. That was contained in the Governor of Maryland. As chief magistrate of the State of Maryland, he felt the important duties involving on him. The election for municipal officers had transpired a few weeks revious There was bloodshed and outrage He had reason to apprehend difficulty and violence. Under that apprehension he visited the city of Baltimore. He consulted the Mayor, but that functionary would consent to no interfesoldiery, for any emergency; but the Kno Nothing Mayor assured him of peace.

When the difficulties originsted, and becan erious, Cov Ligon addressed the Mayor, offer ing to intercede, but his offers of intercession were uncourteously refused. He proposed to the Know Nothing Mayor to visit the disaffected districts, and attempt by their personal influence, and the weight of their office to control them .-But Mayor Hinks refused. The mob progressed. Hundreds were offered up on the Know Nothing altar. Their thirst for blood was satisted; but not until they felt satisfied and asoured that their immediate and local trinmph was

We leave these facts for the appropriate co ments of our people. They will see who are the authors of the disgraceful outrages upon the peace of the country. They will see how the Governor of Maryland attempted to preserve the peace, and how he was frustrated in his efforts. A Know Nothing Mayor accomplished all that was possible to make trouble—to achieve outrages. He succeeded too well The proffers of peace on the part of Governor Ligon were refused. A Know Nothing Mayor allowed and countenanced violence, and we witness the re-But what else could be expected under Know

Nothing rule. The efforts of a patriotic Chief Magistrate availed nothing, when he was frustrated in his peaceable designs by such a man as the Know Nothing Mayor. All shame to the latter and honor to the former!

Death of John M. Clayton.

The telegraph this morning advises us of the death of the distinguished Senator from Delaware. John M. Clayton died yesterday at his residence in that State. We had, from newspaper accounts of his severe illness, apprehended this melancholy end to the great statesman's ca reer; but recent intelligence had led us to believe that he might yet be spared to the country which he had loved and served so long.

Mr. Clayton was a native of the State which he represented so long and ably in the Senate. National and patriotic in his views-an able statesman -an orator of eloquence, and a man of incompatible integrity, he advanced and advocated upon all occasions those measures that con corned the peace and prosperity of the country. Most of his public life was spent in the Senate. where he was always a leading member. During the administration of Gen. Taylor he was Secre tary of State, and his name is interwoven with some of our most important diplomatic transac-

Senator Clayton died a christian. Having erved his country, his friends and humanit well and ably, could he deserve a nobler epitaph "He died a Christian."

That is to be the upshot with Unba If our negotiations for the purchase of the gem of Antilles are unsuccessful, it is not seible that the long coveted prize will remain of the hands of men who are of our blood and kindred, though they may not be setting as American citizens, but in their private capacity s men of the world, soldiers of fortune and

Our friends have established themselves in vicaragua. A sure foothold has been obtained here. But that isolated country will not do. here are no friendly neighbors, and the men who have gone there will always feel as strangers in a strange land until they join hands with us as belonging to a common brotherhood, and can un their boundary line nest to ours. It must all ome to that. The idea is indeed well expressed n the following remark, which we clip from the lew Orleans Delta:

Gen Walker was asked when, if ever, he intended o return to the United States. "Never," replied e "never, until I can return by land."

The laconic and sententious ruler of Nicara rua of course alluded to an overland route brough Central America and Mexico; but not hrough a hostile country-rather one in his o ur peaceable possession.

A large company of men will leave this an ther parts of the West next week for Nicararua. They will be well officered and thoroughly ouiped, and prove valuable additions to Walker's force. Such men and such officers will certainly make their mark, and do something to wards hastening the day when-

TTMr. Buchanan was in Lancaster city or Wednesday, and the Inland Daily says he looked pleased." It is thought, however, that by the 4th of March next he will feel a little worried from the attentions of his friends who may be anxious to serve the public.

Marshall and Turnips. The Journal, the other day, took a new tack ith reference to the member of Congress from this district. His political honors and professions are now sunk, and the distinguished and obese Colonel is presented for the admiration of the public in an entirely novel attitude. He has placed the entire West under great obligationso it is alleged - by the stupendous, the magnifi ent, and the highly patriolie act, of sending to a armer in this county a package of turnip seed! Those seeds were duly planted and, thanks to Providence and Col. Marshall, they duly germin ated in the fruitful soil of the Beargrass valley Such turnips were never seen before. The edior of the Journal received a specimen as large and as full of sense as his hend. He cut it and found the color golden. He are it and found the avor delicious.

Hence comes a puff for the turnips, and a mo stravagant puff for Col. Marshall. He is rated the great benefactor of the agriculture of the West. To him should be returned all thanks and honors for sending that single package of ! turnip seed under his frank. Think of that. reader, when you eat your prandial meal, and taste the dish of turnips To Humphrey Marshall, M. C., all the turnip eaters out West are under everlusting obligations.

The Registry Law No man in the State of Kentucky can have bjections to a registry law properly guarded in Il its provisions. But we desire that there should be no haste in its passage, and no unneessary legislation connected with the inaugura . on of so novel and important an era in our lective franchise. An extra se sion of the leglature is loudly demanded. Why! To pass registry law. The legislature has no power to nake such an enacement. It is beyond its provnce and the scope of its duties. The Constitution of Kentucky prescribes the

equisites and qualifications of voters. It reuires two years residence in the State, or one year in the county and sixty days in the precinct. That provision is as plain as daylight. With i there can be no interference execpt by calling new Convention and amending the Constitution of the State. The right of suffrage cannot be changed, nor abridged by any subsequent legis ative enactment. Kentucky is empowered to provide for the qualifications of her voters, and the Constitution of the United States only reuircs that all voters for members of Congress shall possess the qualifications requisite to vote or the most namerous branch of the State Legslature. The absurdity of an attempt by the gislature to pass a registry law is then foolish the extreme

That object being proven impossible of execuion, what remains! Some cute Know Nothing rick. Is it desired to elect a K. N. Senator to ucceed Hon. J. B. Thompson! Or is it merely charitable intention to relieve the necessities of these adjuncts of the Frankfort Clique who keep boarding houses in the capitol? But this is the last card of Know Nothingism in Kentucky, and it might as well be played out. Gov. Morehead holds the hand.

The Fillmourners, at least the more intelligent f them at the North, never had any confidence in the success of their candidates before the people. They saw from the first that the masses were against them and their principles, and that a popular triumph was impossible. Under this state of case, and relying upon their arts of lemagoguery, fraud and chicanery, they though that if the election was thrown into the House f Representatives there might possibly be ghost of a chance for Mr. Fillmore. To achieve that ever deplorable result they used their bes ndeavors. To defeat Buchanan, and to increas he electoral vote of Fillmore was one of their especial pieces of tactics. That accomplished and there was hope. Without it all was lost We need not say how they missed their figure and how they and their miserable plan to defeat the free hoice of the people was completely

NEW YORK, Nov 10—We understand that the New York and Newfound'and Telegraph Line will be opened through to St. Johu's to morrow, congratulatory messages between the company here and Governor Dudley, of Newfoundland, having massed over the wires yesterday. The line from N. Y. to Newfoundland is 1715 miles in length, 85 willow of which from A. W. W. Y. You Seatist to the state of t miles of which, from Aspe Bay, Nova Scotia, to Cape Ray, Newfoundland, across the Gulf of St. Lawrence, being submarine. The Land line in New-foundland is 405 miles to length, built for the most part through a wilderness country, and has cost the company, including expense of cables, about \$550,000

\$500,000. We are advised by our Liverpool carrespondent that the long contemplated Traus Arlantic Telegraph Company, has actually been formed in London under the suspices of Sir Johu Brett, who has had the susperintendence of all the great submarice telegraphic enterprises in Europe, and one-half of the required capital to complete the line from Newtoundland to Ireland was immediately taken np, and no difficulty whatever was anticipated in obtaining the balance. ed in obtaining the balance.

The Peddier's Prize. A cold winter's night found a stage-load of us gathered about the warm fire of a tavern barroom of a New England village Shortly after we arrived, a peddler drove up and or lered that his horse should be stabled for the night. After we had eaten supper we repaired to the bar-room, and as soon as the ice was broken, the convereation flowed feely Several anecdotes had been related, and finally the peddler was asked to give us a story, as men if his profession were generally full of advenues and anecdotes. Hs was ashor, thickset man, somewhere about forty years of age, and gave evidence of great physical atrengtu. He gave his name as Lemu'l Viney, and his home was in Daver, New Hamp-

the ashes from his pipe and putting it in his pocket, suppose I tell you about the last thing of any consequence that happened to me. You see I am now right from the Far West, and on my way hom for winter quarters. It was about two months ago, one pleasant evening, that I in Hancock county. Indiana. I said it was pleasant-I meant it was warm, but it was cloudy and very likely to be dark. I went in and called for supper, and I had my horse taken care of, and after I had eaten I sat down in the bar-room. It began to rain about eight o'clock, and for a while it poured down good, and it was awful

Now, I wanted to be in Jackson early the next morning, for I expected a load of goods there for me, which I intended to impose of ou my way home. The moon would rise about midnight, and I knew if it did not rain I could get along very comfortably through the mn i after that. So I asked the landlord if he could not see that my horse was fed about midnight, as I wished to be off before two. He expressed not stor for breakfast. Itold him I had sold my last load about all out, and that a new lot goods was waiting for me at Jackson, and I wanted to be there before the express agent left an the morning. There was a number of co-ple sitting around while I told this, but I took but little notice of them; only one arrested my attention. I had in my possession a small package of placards, which I was to deliver to the Sheriff of Jackson, and they were notices for the detection of a no orions robber named Dick Hardhead The bills game a description of his person, and the man before me answered very well to it. In fact it was perfect. He was a tall, well-formed men, rather slight in frame. and hid the appearance of a gentleman, save that his ace bore thise hard, cruel marks which

an charring man cannot mistake for a ything but the index of a v lainous disposition. Wen I went to my chamber I asked the landlord who that man was, describing the sus-pictous individ al. He said he did not know him. He had come there that afternoon and intended to leave next day. The host asked why I wished to know, and I simply told him that the man's countenance was familiar, and I merely wished to know if I was ever acquainte with him. I res lived not to let the landlord into the eccret, but hurry or to Jackson, and there give information to the sheraff, and perhaps he might reach the inn before the villain.

left; for I had no doubt in regard to his identity 'I had an alarm watch, and having set it to give the alarm at one o'clock. I went to sleep I was aroused at the proper time, and immediately got up and drossed myself. When I reached the yard, I found the clouds all passed away and the moon was shining brightly. The hostler was easily aroused, and by two o'clock I was on The mud was doep and my horse could not travel very fast—yet it struck me that the beast made more work than there was any

'However, on we went, a d in the course half-an-hour I was clear if the village. At a short distance ahead lay a large tract of forest, mostly of great pines. The road led directly through this wood, and as n ar as I could remember, the distance was twelve miles. Yet nearly west, I should are light enough. I had entered the woods, and had gone half a mile when my wagon wheels settled with a bump and jerk, into a deep hole. I uttered an excla heard another excl mation from anothe

'What could it be! I hoked quickly around but could see nothing. Yet I knew that the sound I had heard was very close to me. As t e hind wheels came up, I felt something besides the jerk of the wheels. I heard something tumb e from one side to the other of my wagon, and I could also feel the jar occasioned by the movement. It was a man in my cart! I simply knew this on 'he instant. Of course I felt puzzled. At first I imagined some poor fellow had taken this method to obtain a ride; but I soon gave this up, for I knew that any decent man would have stred me for a ride. We next man wou d have asked me for a ride. My nex idea was that somebody had got in to sleep; bu this passed away as quickly as it came, for no man would have broken into my cart for that purpose. And that thought, gentle icn, opened my eyes. Whoever was in there had broken in My next thoughts were of Mr. Dick Hard-

He had heard me say that my load was head. He had heard me say that my load was all aold out, and of course he supposed I had some money with me. In this he was right, for I had over two thousand dol are. I also thought he meant to leave the cart when he apposed I had reached a safe place, and then either creep over and shoot me, or knock me down. All this passed through my mind by the circal had got a vol from the hole. time I had got a rod from the hole.

"Now I never make it a point to brag of my-eelf, but I have seen a great de l of the world, and I am pretty cool and clear headed under difficulty. In a very f w moments my resolution was formed. My h rac was now knee deep in the mud, and I knew I could slip off withou noise. So I drew my revolver—I never trave in that country without one-I drew this, and having twined the reins about the whip tock, I carefully slid down in the mud, and as the care passed on I went behind it and examined the

The door of the cart lets down, and is fastened by a hasp, which alides over a staple and is then secured by a padick. The padlock was gone, and the hasp was secured in its place by a biof pine—so that a slight force from within could bre k it. My wheel wrench hung in a leather bucket on the aide of the cart, and I quickly took it out and slipped it into the staple, the ron handle just sliding down.

"Now I had him. My cart was almost new, made in a atont frame of white oak, and made on purpose for hardusage. I did not believe any ordinary man could break out. I got on to my cart as noiselessly as I got off, and then urged my horse on, still keeping my pistol handy. knew that at the detance of half a mile furth I abould come to a good hard road, and so allowed my horse to pick his own way throug the mud. About ten minutes after this I heard a motion in the cart, followed by a grinding noise, as though some heavy force were being applied to the door I said nothing, but the tees struck me that the villain might judg where I sat and shoot up 'hrough the top of the

Of course, I knew now that my nnexpected passenger was a villain, for he must have been awake ever aince I started, and nothing in 'he world but absolute viliainy would have caused him to remain quiet ao long, and then etart up in this particular place. The thumping an pounding grew louder and louder, and pretty soon I heard a human voice.

'Let me out of this,' he cried, and he yelled Pretty l ud.
I tified up my head so as to make him think

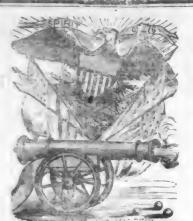

I was siting in my usual place, and then asked him what he was doing there. Tet me out, and I will tell you, he replied

'Let me out, or I'll shoot you through the head,' he yelled. 'Just at that moment my horse's feet struck the hard road, and I knew that the rest of the route to Jackson would be good going. The distance was twelve miles I s'ipped back on the footboard and took the whip. I had the came horse then I'vs got now—a tall, stout, powerful bay mare—and you may believe there's some go in her. At any rate she struck a gai'that even astonished me. She had received a

good mess of oats, the sir was cool, and she felt like going. In fifteen minutes we cleared the woods, and way we went on a keen jump. The chap inside kept yelling to be let out.

'Final'y he stopped, and in a few minntes came the report of a pietol-one-two-thre came the report of a pistol—one—two—thres—four, one right after the other, and I heard the balls whiz over my head. If I had been on my seat, one of these balls, if not two of them, which have gone through me. I popped up my headagain, and gave a yell, and then a deep groun, and then I said, 'Oh, God, save rie! I'm a dead man!'—Then I made a shuffing noise, as though I were failing off and finally sattled. as though I were failing off, and finally settled down on the footboard again. I now urged up the old mare by giving her an occasional poke

The feeling in the market is decidedly subdined; and the general disposition manifested is that of holding back, until the market fairly opens. The large stock of old meat known to be in the country has a very depressing influence on the market for hogs; because, with the exception of an existing demand for mid les for the English market, and a moderate prospective one for mass pork, thede-

They had gone to these polls, and there several attempts were unanccessful. The Governor listened calmly to their complaints, and then referred them to the Mayor. At the same time parties appeared before the Mayor from the 2t and 8th wards, and rendered similar complaints—to all of which the Mayor realled that he would The wheat grown this season (the urst) was a fair yield, and speaks well for the soil. Corn yields abundantly. The sod corn, as it is termed, which is irilled in the urrows at the first "breaking" will yield from 50 to 100 bnsbels per acre. And as for the quality of Nebraska potatoes, we challenge to all of which the Mayor replied that he would ther send the High Consable there, or an aditional force of policemen. About ten o'clock in the morning, policeman Mc-Cafferty, of the fourth ward, was shot by a pistol, the ball taking effect in his thigh. It appears that a man armed with a pistol, and doubtless under the influence of ligner monthed the steps of a weelling. In the neighborhood of Nebraska City timber is abundant. Ch racteristic Outrages. Shameful Violence of the Know Nothing Roudies at Newport.—The circumstances of the outrages perpetrated on Mr. George P. Webster, of Newport, Kentucky, on the election day, having heen very grossily misstated, we think proper to give the facts as they really occurred, drived from authentic and reliable sources. We would prefixe our account of the affair with the remark, that Mr. Webster, having exercised the right of every Webs er, having exercised the right of every American eltizon, of leaving a party whose views had become distasteful to him, has ever since been subjected to constant abuse, insult and annoyance from men and boys in the city of Newport.

Mr Webster went to the polls at the court house in Newport lar the purpose of supporting Busham. Mr Webster went to the polls at the court house in Newport for the purpose of supporting Buchainan and Brockinridge. He was tod by his friends that he would probably he assanized, and had better absent himself. For some time he disregarded their suggestions, but finally yielded to them and left the ground. Good Humor. Among the multitudes of frownin -, scowling rumbling, and ngly looking Know-Nothings whose taces since the election have been blsc with clouds of anger and disappointment, ther are many gentlemen of that order wha in th midst of defeat and mortification, are radian with the smiling sunshine of mpenturbable goo nature. He was in the city vesterday, and owned up, with gaiety and good humor, to the Waterloo defeat. He says he never saw, or heard, or dreamed, o magined of a similar rout; and he acknowledged in his jovial way that wherever he spoke, (an he made a great many good speeches,) the Democrats gained largely!

We honor Mr. Lee for his candor, for his phisophy, and for his manliness in owning up is to he hoped that he will learn the error of his ways, and be on the right side nex

Gny Fawkes' Day

By some singular and yet exceedingly appro riate coincidence it chances that our Presiden tial election and Guy Fawkes' day-an era ceiebrated for the attempt to blow up the Parliament Houses in London-occurred upon the same day. The hase and infamous scheme to destroy the nobility and patriotism of our mother country three hundred years ago. A conspi racy in our own midst, quite as had, which hreatened our liberties and our Union, has been

divulged, and the same fate meets it On November 7, 1650, the patriotic heart England heat rapturously at the almost miracu lous preservation of the champions of Englis

freedom. On the 7th of November, 1856, the friends of all that is good and just conservative and constitutional in the United States may lift up thei heerts and voices in thanksgiving

It does not often happen that such a coincidence occurs. Two hundred years ago the mother was saved. To-day, the daughter is freed from all danger of internal or external enemies. And this remines as of an old fact, the affidaits for which may be found with Mr. Mellus of the Theater. It is this - In old times, that is about a hundred years ago, an old fashion pro valled. The New York Times announces the probable eath in Nicsragua of Charles W. Webber, s ative of Christian county, in this State, and a former resident of our city. Mr. W. has atteined considerable reputation as a writer for the periodical press. He was the author of a tale alled "Shot in the Eye," and several other spirted tales and sketches of life on the Border, or, ginally published in the American Review, with bich at one time he had an editorial connection Mr. Webber was of a thoroughly adventurous lisposition and somewhat irregular habits-and inder these joint impulses joined the army o Walker previous to his recent engagemen's .-Letters received from that country state that h was in the hattle of Massays, where he fought all day with a marked gallantry, and that he left aoon after, intending to join his wife, who was aome few miles distant, and then return to the Unit d States. Nothing, however, had been heard of him afterwards, although several days had elapsed, and it is supposed that he must have been murdsred.

Mr. Webber was a man of decided ability, o nigh qualities of mind and heart, noble and chiv alrie in his impulses, handsome in person, and fitted in every way-with steadine s of judgment and self control, both of which he lacked-to have achieved marked and honorable success in any walk of life His hook, "The Hunter Natural at," gives abundant proof of his ability and of the enthusiasm which was part of his nature.

Blessings, like misery, never come singly They crown us with happiness profusely. We have asved the country. We have elected Buchanan and now, thanks to the same overruling and kind Providence, we are now hlessed with a most glorious and refreshing rain. Last night the water came down in torrents, straight from the free and pure vault of heaven above, falling upon Democratic soil, and encouraging loyal hearts. 'The river is now bound to rise. Coal will be plenty. Business will be brisk. All

A FALSE REPORT .- The romautic story in the Bulletin of yesterday evening, relative to the apture of two young ladles in an interior county, and their being carried off by force, is wholly untrue. Nothing of the sort ever occurred. The luventor of the falsebood was suffering from mania a potu, conceived in his foolish imagination the ridiculous fiction, and wrote to genttemen in this city the particulars of the affsir mentioned in the Bulletin.

NEW YORK, Oct. 27, 1956 La 1827 a company was organized in the city In 1837 a company was organized in the city of New York under a charter granted by the Legi latter of the State, with the title of the American Lastitute. At the head of this association, who look the most active part in its organization were the Hou. Henry Meigs, and T. B. Wakeman, Esq. and whose leading object was to encourage agriculture, manufactures, commerce and the aris. It has promotion of this great cause, these gentlement were untringed in their efforts to scene procession or American mant factures by special jegislation American mantractures by special registation (Congress, and it was through their labes directly and indirectly that the first acts of a discriminatin tariff were passed and to which our country is a larg by it lebeted for much of the prosperly which we, as a nation, now enjoy. In order to awake it general interest in American manufactures, in annal exhibitions of the Institute were esta shed which have been con inued from that per ntil the present, increasing in interest, magi

until the present, increasing in interest, magnitude and assences, next income and assences. In a multiple and its annual exhibitious.

In connection with this association there have energy ablished what is termed the American Intitute Farmers' Club. This club hold semi-month y meetings at the office of the Institute, where subjects of the highest importance to American agriguitance are freely dispussed. This is the 29th exhibition of the American Inc. te, and in mano respects it is the most interesting it important that has been held. The great rystal Palace has been appropriated to its use; ructure that hould be purchased and retained is returned that mount be purchased and retained for ill coming time for these great national exhibitions. I shall not attempt to give a general notice of ill that is to be seen here, but shall confine my remarks to some of the new and neeful inventions mostly of the past year. Most of these are in the machine or power department.

Mr. W. B. Dutcher of Troy, N. Y., exhibits a newl

Y., als hiblts in full operation a newly invented rope in machine which operates most admirably. fers in its construction from most other rope An entire new method of one chines. An entire new method of operation in running the spools and imparting the twist is employed giving a more sm oth, even and compact lay to the rope. The machine accomplishes about twice as much work in a given time so the common machines, and occupies only about half the space, and is run with about one half the powar, and is more simple and more easily managed. Few inventions have exceeded in importance those employed in the art of rope mixing.

e aking machine which is in

the art of rope making. Exca Jones, of Rochester, N. Y., exhibits in or r works vertically between quids, and is con cted directly to a piston and evlinder above. thrown up by a cam, forming vacuum below, the pressure of the atmosphere throws it down will great violence and power; yet it can be controlle and checked at any point, employing no mo power than is desired, by preventing the escape, below the piston. It makes 400 strokes innte, and the force of the blow can be regula rith great sase and precision, according to the equirements of the work to be done, by a valv

reat rapidity by turning a erank by hand. If y horse or steam power its capacity would st. reatly increased. The whole machine is extra by norse or steam power in capacity wonth still greatly increased. The whole machine is extret ly simple and is sold at the low price of \$16. Portable Saw Mills.—There are several impro-saw mills in operation, one by Pinoy, Young Co., of Milwankie, Wisconsin. The saw is a cir arone, and is so arranged that it cuts both forward back. The log is adjusted for the thickness he board to be out by self acting machinery, hat when a log is placed on the carriage, no o ac board to be cut by self acting machinery, so that when a log is placed on the carriage, no o her stention is required, but to carry off the lumber. It is said that these machines will cut from 2000 0 2300 feet of siding per hour. The millis simple, asily taken apart and set up, and occupies but

ttle space. Price \$1,000 and upwards according ittle space. Price St., too and appearance of No. 212. Bro dway, N. Y., exhibits one of Ehram's patent machines for cutting down forest trees. It is simple and cheap, but not as efficient as the one I described on exhibition at the New York State Fair. It consists of an iron ring, hinged on one side, so that it may be opened and brought together again around a tree. There is a cogged rim which gain around a tree. There is a cogged rim which ontains a cutter, this is made to revolve round and

ontains a cutter, thin is made to revolve round and ound the tree by means of a crank and pinion niting inward as it turns. Price \$35.

Cow Milking Machine.—Mr. John W. Kingman, f Dover, N. H., exhibits a contrivance for milking ows, which is said to operate with perfect success t consists of an air-tight milk pall, from which the ir is exhansted by means of a small air pump.— Four flexible tubes, each having an India rubbe termine the severity of the action of these machines, upon the teats and bag of the cow, and they must at times cause more or less pain; therefore, on the scile of humanity, their atility may be question-

ed by George W. Holmes and assignee to Jarvin C Marhle, of Boston, Massachusetts. This is a ver imple, as well as useful, invention; not only m a large pole several hoops may be cut, all

is not great.

Peck's Patent Drop Press.—This machine is man facinced by Milo Peck, New Haven, Connecticat tis for stamping me tals for various purposes, such that the control of the con is powerful in Its action, and very complete is

One of the machines was made by Lee & Learned, of New York, and one by Sillsby, Myuderse & Co., Seneca Falls, N.Y. The first trial did not prove satisfactory to all the parties, and was repeated. The engine of Lee & Learned comprenced playing in seven minutes from the time

tensive business has sprung up in the principal cities in supplying dwellings, offices, &c., with ki dling wood. This new branch of trade has ki dling wood. This new branch of trade has arisen from the invention of several pondsrons machin's for sawing and splitting fine and other wood into small pieces, with an expediton truly astomshing rapidity. A load is sawed, aplit and placed in boxes all by machinery in less than ten minutes. The wood is delivered to families or dealers in loads of nune boxes each, for \$2.75, \$vereboxes for \$1.75, or a single box for 38 cts.

Portable Gas Works.—There is on exhibition everal different portable gas machines, adapted to villages, factories, churches, hotels, &c. These manufacture the gas from refuse green rosin, and

There are many other useful inventions that are worthy of notics, but which must be deferred until another time.

November.

A month like the present, so famous and so nportant-in which the greatest people of the earth choose their ruler, and all the happy families of the republic sit about the Thanksgiving board, and make merry as bountifully blessed froman only can, certainly deserves some notice We therefore give the following scraps of information, previous to the Julian reform of the calender effected by Casar, Novamber was counted and obtained its name from being the ninth month in the Roman year; according to the present calender it is the elevanth month in the year. By our Savon ancesters it was called

contmonat, (wind month.) The first day o the month is All Saints Day, a estival of the Romish and English Churches, neld in honor of all those saints who had not articular days appointed for them. Among the Pagans it was one of the four great festivals. In Ireland it was formerly regarded as the proper ime for returning thanks for the realized fruits of the earth, and called La Mas U hal. The 2d, A'll Soul's Day, or the Commemoration of th Faithful Departed, is held as a very solemn estival in the Romish Church, with masses and remonies appropriate in favor of the souls of all the dead. St. Martin's Day or Martin mas, conrring on the 11th, was forme ly celebrated ly the Church of England; a quarterly term day in England; a day of feating in Scotland; and on the continent-distinguished convivially. St. Clement's Day, on the 23rd, was formerly kept y the same Church, but has gone out of use. . Clement is held as the patron saint of the lacksmiths. The 30th, St. Andrew's Day, is still a festival day in the Church of England, held in honor of one of the Apoetlea. There was an ancient custom connected with St. Andrew's day, as mentioned by Luther, when maldns on the eve of that day sought to learn what ort of husbands they were to have by praying in these terms: "Oh, St. Andrew, cause that obtain a good pious husband; to-night show me the figure of the man who will take me to wife." In the present month this day occurs on Sunday, which, being the fourth Sunday previous to Christmas, is the commencement of Advent-literally, the coming-celebrated by

both the English and Romish churches. In American chronology, the present month as several days on which noted event 1 occurred. on the 31, 1313, the battle of Ta'lasatchee was ught, the 4th, 1791, St. Clair was defeated; he 7th, 1911, the battle of Tippecanoe was bught; the 11th, 1813, the battle of Queenstown Heights; the 15th, 1773, Tea destroyed at Boson; 17th, 1776, Fort Washington was taken; 25th 1783, New York was evacuated by the British; 27th, 1813, a severe earthquake in the New England States; 28th, 1794, Baron Steuben. an officer in the Revolution, died; 29th, 1779,

Savannah taken by the British. IT The advances, says the New York Journal f Commerce, in the value of silver abroad, has reated a demand for small silver coin for axort to Cuba and other points South, and a preium has been paid for dimes; which will pass for the same as shilling pieces (12) cents) when he latter is scarce. This has led to the impresion that silver change is scarce and can only be rocured at a premium. This is not so; silver an be obtained at the United States Mint at Philadelphia in exchange for gold at par, and nerchants and others who want it for the purose or change, ean procure it in sums of from 850 to \$100 at the Sub Treasury, without change

Marble Sawlag Machines.—It is about twelve months since some marble manufacturers in Vermont offered \$10,000 to the laventor of a machine that would saw blocks of marble into angular shapes. Is less than six months seven machines were invented, parented, and in successful operation, ad pted to this purpose. Since hat time as many more have been introduced, and have worked a great revolution in the marble cutting business.

One of these machines is in operation in the Palace,
